Service Features and Benefits

akira complete offers the most comprehensive integrated set of tools to improve your workday experience and reduce workload. Our completely integrated solution allows you to store and share clinic resources, access patient information, plan treatment, electronically sign prescriptions, patient referrals and reports, compile and assess patient progress and create dictations. Reach all referring doctors and staff with a personalized message centre and communicate with parents using a confidential multi-lingual communication record.

Clinical Benefits:

- ✓ Streamlined clinical management
- ✓ Makes it easier for patient/client and parents to stay involved
- ✓ Online visit questionnaires
- ✓ Progress tracking and reporting
- ✓ Shared resources make it easier to collaborate
- ✓ Confidential communication record
- ✓ Akira meets and in some cases exceeds the hospitals security protocols
- ✓ Ministry out of country approval forms
- ✓ Customizable to meet any clinical needs and work flows
- ✓ Built for mobility via mini computers and tablets
